

International Workshop on Nonlocal Models, PDEs and Applications

13 - 14 May 2019 Caen, Normandy, FRANCE

Keynote n°11 : Noureddine IGBIDA

Université de Limoges, FRANCE

Title: On the Eikonal equation and some related problems

The aim of the talk is to give an overview concerning the connection between the Eikonal equation, the sandpile and the optimal mass transport problem. We'll discuss the continuous as well as the discrete and non local approaches for these problems
